ASEAN Trade in Goods Agreement (ATIGA)

In pursuing the goal of establishing a single market and production base with free flow of goods by 2015 for the ASEAN Economic Community, a more integrated and holistic approach would be required. This calls for the integration and inclusion of existing and additional measures relevant to the trade in goods initiative under one umbrella. To achieve this, the ASEAN Economic Ministers agreed in August 2007 to enhance the Common Effective Preferential Tariff for ASEAN Free Trade Agreement (CEPT-AFTA) into a more comprehensive legal instrument. This led to the signing of the ASEAN Trade in Goods Agreement (ATIGA) in February 2009.

Key Elements of the ATIGA

- (i) ATIGA consolidates and streamlines all the provisions in the CEPT-AFTA, and formalizes several ministerial decisions. As a result, the ATIGA has become a single legal instrument for government officials who implement and enforce the Agreement, as well as for the private sectors who are the beneficiaries.
- (ii) The ATIGA annex provides the full tariff reduction schedule of each Member States and spells out the tariff rates to be applied on each product for each year up to 2015. This makes tariff reduction schedules transparent and predictable for the business community. A single legal enactment to effectively implement the stipulated reduction schedule up to 2015 is also expected.
- (iii) The ATIGA comprises elements to ensure the realisation of free flow of goods within ASEAN, including the following: tariff liberalisation, removal of non-tariff barriers, rules of origin, trade facilitation, customs, standards and conformance, and sanitary and phytosanitary measures. The ATIGA contains comprehensive coverage of commitments related to trade in goods and mechanisms for its implementation as well as institutional arrangements. This would allow for synergy of actions being undertaken by the various ASEAN Sectoral Bodies.

- (iv) With the objectives of eliminating non-tariff barriers, the provisions of non-tariff measures (NTM) in the ATIGA have been enhanced further through codification of measures, as well as establishment of a mechanism to monitor the committed elimination of non-tariff barriers.
- (v) The ATIGA places emphasis on trade facilitation measures by including the ASEAN Framework on Trade Facilitation. Subsequently, ASEAN has developed the Trade Facilitation Work Programme for the period of 2009-2015.

Entry into Force of the ATIGA

The ATIGA entered into force on 17 May 2010 with transition period of 180 days to ensure a smooth transition from the CEPT scheme into the ATIGA. After the transition period, no CEPT Form D shall be issued. In other words, only ATIGA Form D shall be issued.

5 For products of sea-fishing obtained from outside the territorial waters (e.g. Exclusive Economic Zone), originating status would be conferred to that Member State with whom the vessels used to obtain such products are registered with and whose flag is flown in the said vessel, and provided that that Member State has the rights to exploit it under international law.

6 In accordance with international law, registration of vessels could only be made in one Member State.

- CHAPTER
3
- (i) Articles collected there which can no longer perform their original purpose nor are capable of being restored or repaired and are fit only for disposal or recovery of parts of raw materials, or for recycling purposes;
 - (j) Waste and scrap derived from:

 - (i) if the goods have a regional value content (hereinafter referred to as “ASEAN Value Content” or the “Regional Value Content (RVC)”) of not less than forty percent (40%) calculated using the formula set out in Article 29; or
 - (ii) if all non-originating materials used in the production of the goods have undergone a change in tariff classification (hereinafter

referred to as “CTC”) at four-digit level (i.e. a change in tariff heading) of the Harmonized System.

- (b) Each Member State shall permit the exporter of the good to decide whether to use paragraph 1(a)(i) or 1(a)(ii) of this Article when determining whether the goods qualify as originating goods of the Member State.
2. (a) Notwithstanding paragraph 1 of this Article, goods listed in Annex 3 shall qualify as originating goods if the goods satisfy the product specific rules set out therein.
- (b) Where a product specific rule provides a choice of rules from a RVC-based rule of origin, a CTC-based rule of origin, a specific manufacturing or processing operation, or a combination of any of these, each Member State shall permit the exporter of the goods to decide which rule to use in determining whether the goods qualify as originating goods of the Member State.
 - (c) Where product specific rules specify a certain RVC, it is required that the RVC of a good is calculated using the formula set out in Article 29.
 - (d) Where product specific rules requiring that the materials used have undergone CTC or a specific manufacturing or processing operation, the rules shall apply only to non-originating materials.
3. Notwithstanding paragraphs 1 and 2 of this Article, a good which is covered by Attachment A or B of the *Ministerial Declaration on Trade in Information Technology Products*

adopted in the Ministerial Conference of the WTO on 13 December 1996, set out as Annex 4, shall be deemed to be originating in a Member State if it is assembled from materials covered under the same Annex.

Article 29 Calculation of Regional Value Content

1. For the purposes of Article 28, the formula for calculating ASEAN Value Content or RVC is as follows:

(a) *Direct Method*

$$RVC = \frac{\text{ASEAN Material Cost} + \text{Direct Labour Cost} + \text{Direct Overhead Cost} + \text{Other Cost} + \text{Profit}}{\text{FOB Price}} \times 100 \%$$

or

(b) *Indirect Method*

$$RVC = \frac{\text{FOB Price} - \text{Value of Non Originating Materials, Parts or Goods}}{\text{FOB Price}} \times 100 \%$$

2. For the purposes of calculating the RVC provided in paragraph 1 of this Article:

- (a) **ASEAN Material Cost** is the CIF value of originating materials, parts or goods that are acquired or self-produced by the producer in the production of the good;
- (b) **Value of Non-Originating Materials, Parts or Goods** shall be:

- (i) The CIF value at the time of importation of the goods or importation can be proven; or
 - (ii) The earliest ascertained price paid for the goods of undetermined origin in the territory of the Member State where the working or processing takes place;
- (c) **Direct labour cost** shall include wages, remuneration and other employee benefits associated with the manufacturing process;
- (d) **The calculation of direct overhead cost** shall include, but is not limited to, real property items associated with the production process (insurance, factory rent and leasing, depreciation on buildings, repair and maintenance, taxes, interests on mortgage); leasing of and interest payments for plant and equipment; factory security; insurance (plant, equipment and materials used in the manufacture of the goods); utilities (energy, electricity, water and other utilities directly attributable to the production of the goods); research, development, design and engineering; dies, moulds, tooling and the depreciation, maintenance and repair of plant and equipment; royalties or licences (in connection with patented machines or processes used in the manufacture of the goods or the right to manufacture the goods); inspection and testing of materials and the goods; storage and handling in the factory; disposal of recyclable wastes; and cost elements in computing the value of raw materials, i.e. port and clearance charges and import duties paid for dutiable component; and
- (e) **FOB price** means the free-on-board value of the goods as defined in Article 25. FOB price shall

be determined by adding the value of materials, production cost, profit and other costs.

3. Member States shall determine and adhere to only one (1) method of calculating the RVC. Member States shall be given the flexibility to change their calculation method provided that such change is notified to the AFTA Council at least six (6) months prior to the adoption of the new method. Any verification to the ASEAN Value Content calculation by the importing Member State shall be done on the basis of the method used by the exporting Member State.
4. In determining the ASEAN Value Content, Member States shall closely adhere to the guidelines for costing methodologies set out in Annex 5.
5. Locally-procured materials produced by established licensed manufacturers, in compliance with domestic regulations, shall be deemed to have fulfilled the origin requirement of this Agreement; locally-procured materials from other sources shall be subjected to the origin verification pursuant to Article 57 for the purpose of origin determination.
6. The value of goods under this Chapter shall be determined in accordance with the provisions of Article 57.

Article 30

Accumulation

1. Unless otherwise provided in this Agreement, goods originating in a Member State, which are used in another Member State as materials for finished goods eligible for preferential tariff treatment, shall be considered to be originating in the latter Member State where working or processing of the finished goods has taken place.

2. If the RVC of the material is less than forty percent (40%), the qualifying ASEAN Value Content to be cumulated using the RVC criterion shall be in direct proportion to the actual domestic content provided that it is equal to or more than twenty percent (20%). The Implementing Guidelines are set out in Annex 6.

Article 31

Minimal Operations and Processes

1. Operations or processes undertaken, by themselves or in combination with each other for the purposes listed below, are considered to be minimal and shall not be taken into account in determining whether a good has been originating in one Member State:

- (a) ensuring preservation of goods in good condition for the purposes of transport or storage;
- (b) facilitating shipment or transportation; and
- (c) packaging or presenting goods for sale.

2. A good originating in the territory of a Member State shall retain its initial originating status, when exported from another Member State, where operations undertaken have not gone beyond those referred to in paragraph 1 of this Article.

Article 32

Direct Consignment

1. Preferential tariff treatment shall be applied to goods satisfying the requirements of this Chapter and which are consigned directly between the territories of the exporting Member State and the importing Member State.

2. The following shall be considered as consigned directly from the exporting Member State to the importing Member State:

- (a) goods transported from an exporting Member State to the importing Member State; or
- (b) goods transported through one or more Member States, other than the exporting Member State and the importing Member State, or through a non-Member State, provided that:
 - (i) the transit entry is justified for geographical reason or by consideration related exclusively to transport requirements;
 - (ii) the goods have not entered into trade or consumption there; and
 - (iii) the goods have not undergone any operation there other than unloading and reloading or any other operation to preserve them in good condition.

Article 33 ***De Minimis***

1. A good that does not undergo a change in tariff classification shall be considered as originating if the value of all non-originating materials used in its production that do not undergo the required change in tariff classification does not exceed ten percent (10%) of the FOB value of the good and the good meets all other applicable criteria set forth in this Agreement for qualifying as an originating good.

2. The value of non-originating materials referred to in paragraph 1 of this Article shall, however, be included in the value of non-originating materials for any applicable RVC requirement for the good.

Article 34

Treatment of Packages and Packing Materials

1. Packaging and Packing Materials for retail sale:
 - (a) If a good is subject to the RVC-based rule of origin, the value of the packaging and packing materials for retail sale shall be taken into account in its origin assessment, where the packaging and packing materials for retail sale are considered to be forming a whole with the good.
 - (b) Where paragraph 1 (a) of this Article is not applicable, the packaging and packing materials for retail sale, when classified together with the packaged good shall not be taken into account in considering whether all non-originating materials used in the manufacture of a product fulfils the criterion corresponding to a change of tariff classification of the said good.

2. The containers and packing materials exclusively used for the transport of a good shall not be taken into account for determining the origin of the said good.

Article 35

Accessories, Spare Parts and Tools

1. If a good is subject to the requirements of CTC or specific manufacturing or processing operation, the origin of accessories, spare parts, tools and instructional or other information materials presented with the good shall not be

taken into account in determining whether the good qualifies as an originating good, provided that:

- (a) the accessories, spare parts, tools and instructional or other information materials are not invoiced separately from the good; and
- (b) the quantities and value of the accessories, spare parts, tools and instructional or other information materials are customary for the good.

2. If a good is subject to the RVC-based rule of origin, the value of the accessories, spare parts, tools and instructional or other information materials shall be taken into account as the value of the originating or non-originating materials, as the case may be, in calculating the RVC of the originating good.

Article 36 **Neutral Elements**

In order to determine whether a good originates, it shall not be necessary to determine the origin of the following which might be used in its production and not incorporated into the good:

- (a) fuel and energy;
- (b) tools, dies and moulds;
- (c) spare parts and materials used in the maintenance of equipment and buildings;
- (d) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;

- (e) gloves, glasses, footwear, clothing, safety equipment and supplies;
- (f) equipment, devices and supplies used for testing or inspecting the good;

- (h) any other goods that are not incorporated into the good but of which use in the production of the good can reasonably be demonstrated to be a part of that production.

Article 37

Identical and Interchangeable Materials

1. The determination of whether identical and interchangeable materials are originating materials shall be made either by physical segregation of each of the materials or by the use of generally accepted accounting principles of stock control applicable, or inventory management practice, in the exporting Member States.
2. Once a decision has been taken on the inventory management method, that method shall be used throughout the fiscal year.

Article 38

Certificate of Origin

A claim that a good shall be accepted as eligible for preferential tariff treatment shall be supported by a Certificate of Origin (Form D), as set out in Annex 7 issued by a Government authority designated by the exporting Member State and notified to the other Member States in accordance with the Operational Certification Procedures, as set out in Annex 8.

2. Each Member State shall ensure the transparency of its non-tariff measures permitted in paragraph 1 of this Article in accordance with Article 12 and shall ensure that any such measures are not prepared, adopted or applied with the view to, or with the effect of, creating unnecessary obstacles in trade among the Member States.

CHAPTER 7

STANDARDS, TECHNICAL REGULATIONS AND CONFORMITY ASSESSMENT PROCEDURES

Article 71

Objective

The objective of this Chapter is to establish provisions on standards, technical regulations and conformity assessment procedures to ensure that these do not create unnecessary obstacles to trade in establishing ASEAN as a single market and production base, and at the same time ensure that the legitimate objectives of Member States are met.

Article 72

Terms and Definitions

General terms concerning standardisation and conformity assessment used in this Chapter have the meaning given to them

in the definitions contained in the appropriate editions of ISO/IEC Guide 2 and ISO/IEC 17000 of the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) as cited in the *ASEAN Framework Agreement on Mutual Recognition Arrangements* and the relevant ASEAN Sectoral Mutual Recognition Arrangements.

Article 73 **General Provisions**

1. Member States reaffirm and are committed to abide by the rights and obligations under *the Agreement on Technical Barriers to Trade* contained in Annex 1A to the WTO Agreement.

2. Member States shall take any of the following possible measures or their combinations to mitigate, if not totally eliminate, unnecessary technical barriers to trade:
 - (a) harmonise national standards with relevant international standards and practices;
 - (b) promote mutual recognition of conformity assessment results among Member States;
 - (c) develop and implement ASEAN Sectoral Mutual Recognition Arrangements and develop ASEAN Harmonised Regulatory Regimes in the regulated areas where applicable; and
 - (d) encourage the co-operation among National Accreditation Bodies and National Metrology Institutes (NMIs) including relevant legal metrology authorities in ASEAN to facilitate the implementation of Mutual Recognition Arrangements (MRAs) in regulated and non-regulated sectors.

3. To facilitate the free movement of goods within ASEAN, Member States shall develop and implement a Marking Scheme, where appropriate, for products covered under the ASEAN Harmonised Regulatory Regimes or Directives.

Article 74 Standards

1. Each Member State undertakes that its national standards authorities accept and follow the *Code of Good Practice for the Preparation, Adoption and Application of Standards* as provided for in Annex 3 of the *Agreement on Technical Barriers to Trade* as contained in Annex 1A to the WTO Agreement.

2. In harmonising national standards, Member States shall, as the first and preferred option, adopt the relevant international standards when preparing new national standards or revising existing standards. Where international standards are not available, national standards shall be aligned among Member States.

3. Member States are encouraged to actively participate in the development of international standards, particularly in those sectors that have trade potential for ASEAN.

4. Harmonisation of the existing national standards and adoption of international standards into new national standards should be based on "*Adoption of International Standards as Regional or National Standards*", as contained in the ISO/IEC Guide 21 or its latest edition.

5. Whenever modifications of contents and structure of the relevant international standards are necessary, Member States shall ensure an easy comparison of the contents and structure of their national standards with the referenced international standards and provide information to explain the reason(s) for such modifications.

6. Member States shall ensure that:
- (a) the modifications of contents of international standards are not prepared and adopted with a view to, or with the effect of, creating unnecessary technical barriers to trade; and
 - (b) the modifications of contents shall not be more restrictive than necessary.

Article 75 **Technical Regulations**

1. In adopting technical regulations, Member States shall ensure that:

- (a) these are not adopted with a view, to or with the effect of, creating technical barriers to trade;
- (b) these are based on international or national standards that are harmonised to international standards, except where legitimate reasons for deviations exist;
- (c) alternative means that are least trade restrictive to achieve the desired objectives are considered before a decision is taken on the adoption of technical regulations;
- (d) the adoption of prescriptive standards is avoided to ensure that unnecessary obstacles to trade are not introduced, to enhance fair competition in the market or that it does not lead to a reduction of business flexibility; and
- (e) treatment accorded to products imported from Member States is no less favourable than that

accorded to like products of national origin and to like products originating from any other Member State.

2. Member States shall ensure that only those parts of a standard that represent minimum requirements to fulfil the desired objectives are referred to in the technical regulations.

3. Member States shall also ensure that, wherever applicable, the preparation, adoption and application of technical regulations are to facilitate the implementation of the respective ASEAN Sectoral Mutual Recognition Arrangements.

4. Whenever the need for technical regulations is urgent for overcoming problems that arise or threaten to arise within the territory of a Member State and the available time does not allow such Member State to harmonise the relevant national standards, that Member State shall consider using the appropriate international standards or the relevant parts of them as the first alternative.

5. Member States shall comply with the notification procedures as stipulated in Article 11. However, in the case of technical regulations under this Article, other Member States shall present their comments, if any, within sixty (60) days of the notification. Member States shall, upon request, provide to other Member States the draft of the technical regulation and other information regarding the deviations from the relevant international standards and the applicable pre-market conformity assessment procedure.

6. Except in urgent circumstances, Member States shall allow at least six (6) months between the publication of technical regulations and their entry into force in order to provide sufficient time for producers in exporting Member States to adapt their products or methods of production to the requirements of importing Member States.

Article 76

Conformity Assessment Procedures

1. Member States shall ensure that conformity assessment procedures are not prepared, adopted or applied with a view to, or with the effect of, creating unnecessary technical barriers to trade and that conformity assessment procedures that have to be complied with by suppliers of products originating in the territories of other Member States are not more stringent than those accorded to suppliers of like products of national origin.

2. Member States shall adopt conformity assessment procedures that are consistent with international standards and practices and wherever such procedures cannot be achieved because of differences in legitimate objectives, the differences of conformity assessment procedures shall be minimised as far as possible.

3. Member States shall develop and implement ASEAN Sectoral Mutual Recognition Arrangement in the regulated areas, where appropriate, in accordance with the provisions of *the ASEAN Framework Agreement on Mutual Recognition Arrangements*.

4. Member States shall accept the results of conformity assessment produced by conformity assessment bodies designated by other Member States in accordance with the provisions of *the ASEAN Framework Agreement on Mutual Recognition Arrangements* and the provisions of the respective ASEAN Sectoral Mutual Recognition Arrangements in all regulated areas.

5. Member States shall establish co-operation among National Accreditation Bodies and National Metrology Institutes (NMIs), including legal metrology in ASEAN to facilitate the

implementation of MRAs in regulated and non-regulated sectors.

Article 77 **Post Market Surveillance**

1. Member States shall establish post market surveillance systems to complement the implementation of the ASEAN Sectoral Mutual Recognition Arrangements and ASEAN Harmonised Regulatory Regimes and/or Directives.
2. The relevant authority that undertakes the post market surveillance system of the Member States shall take the necessary actions to ensure compliance of products placed in the market with the applicable ASEAN Sectoral Mutual Recognition Arrangements and ASEAN Harmonised Regulatory Regimes and/or Directives.
3. Member States should ensure that the necessary laws and technical infrastructure are in place to support post market surveillance systems.
4. The effectiveness of the post market surveillance systems shall be further enhanced through the establishment of Alert Systems among Member States.

- (a) identifying and initiating sectoral MRAs;
- (b) monitoring the effective implementation of the relevant provisions of this Agreement in respect of standards, technical regulations and conformity assessment procedures;
- (c) providing support to the respective Joint Sectoral Committees when required; and
- (d) collaborating with the ASEAN Secretariat to provide regular feedback on the implementation of this Agreement.

4. The ACCSQ shall provide support and co-operation under the relevant ASEAN Free Trade Agreements (FTAs) with Dialogue Partners, including capacity building and institutional

strengthening programmes for Standards, Technical Regulations and Conformity Assessment Procedures Chapters in such ASEAN FTAs.

5. The ACCSQ shall take the necessary actions to ensure effective implementation of the ASEAN Sectoral Mutual Recognition Arrangements and ASEAN Harmonised Regulatory Regimes.

PRINCIPLES AND GUIDELINES FOR CALCULATING REGIONAL VALUE CONTENT ON THE ATIGA

- A. Principles to Determine Cost for Regional Value Content**
- i. Materiality** – all cost material to the evaluation, assessment and determination of origin;
 - ii. Consistency** – costing allocation method should be consistent unless justified by commercial reality;
 - iii. Reliability** – costing information must be reliable and supported by appropriate information;
 - iv. Relevance** – costs must be allocated based on objective and quantifiable data;
 - v. Accuracy** – costing methodology should provide an accurate representation of the cost element in question;
 - vi. Application of GAAP of the exporting country** – costing information must be prepared in accordance with the generally accepted accounting principles and this includes the avoidance of double-counting of cost items;
 - vii. Currency** – updated costing information from existing accounting and costing records of companies should be used to calculate origin.

B. Guidelines for Costing Methodologies

- i. **Actual Costs** – basis for actual costs should be defined by the company. Actual costs should include all direct and indirect costs incurred in producing the product;
- ii. **Projected and Budgeted Costs** – projected costs may be used if it is justified. Companies should provide variance analysis and proof during the period origin is claimed to indicate accuracy of projections;
- iii. **Standards Costs** – the basis for standards costs should be indicated. Companies should provide evidence that the costs are used for accounting purposes;
- iv. **Average/Moving Average Costs** – average costs may be used if justified; the basis for calculating average costs, including time period, etc. should be highlighted. Companies should provide variance analysis and proof during the period origin is claimed to indicate accuracy of average costs;
- v. **Fixed Costs** – fixed costs should be apportioned according to sound cost accounting principles. They should be a representative reflection of unit costs for the company in the particular period in question. The method for apportionment should be indicated.
